

## Metrics-Based Process Mapping: Identifying and Eliminating Waste in Office and Service Processes (Paperback)

By Karen Martin, Mike Osterling

Taylor Francis Inc, United States, 2012. Paperback. Book Condition: New. 2nd Revised edition. 252 x 178 mm. Language: English . Brand New Book. Metrics-Based Process Mapping (MBPM) is a tactical-level, visual mapping approach that enables improvement teams to make effective, data-based decisions regarding waste elimination and measure ongoing process performance. The mapping technique, often used to drill down from a value stream map, integrates the functional orientation of traditional swim-lane process maps with time and quality metrics that are essential for designing improved processes. Building on the success of its popular predecessor, Metrics-Based Process Mapping: An Excel-Based Solution, this book takes readers to the next level in understanding processes and process improvement. Included with the book is an interactive macro-driven Excel tool, which allows users to electronically capture their current and future state maps. The tool also audits the maps for completeness, summarizes the metrics, and auto-calculates the improvements. Improvements to this version include: \* Foundational content about processes-what they are and how they vary \* A description of the difference between value-stream and process-level maps \* New content about how to bridge the gap between your current state and your desired future state \* Tips for effective team formation...
