

TIME REVERSAL BASED SIGNAL PROCESSING TECHNIQUES

By Mehmet Emre Yavuz

VDM Verlag Jun 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x9 mm. This item is printed on demand - Print on Demand Neuware - Over last few decades, the time-reversal techniques have increasingly found applications in various disciplines ranging from medicine to telecommunications. One such discipline is the microwave remote sensing where only a limited academic literature exists on how to utilize time-reversal concept for improved sensing performance. This book, therefore, introduces novel time-reversal based signal processing techniques employing ultrawideband electromagnetic waves for the detection and imaging of obscured objects. Several distinct algorithms utilizing spatial, frequency and polarization data have been theoretically and numerically analyzed and an inverse filter approach is introduced for the compensation of lossy and dispersive environment effects. The algorithms presented here should especially be helpful to professionals in the fields of Microwave Remote Sensing and Signal Processing or anyone else who may consider adapting these algorithms in different applications such as microwave breast cancer detection, nondestructive testing or synthetic aperture radar. 148 pp. Englisch.

Reviews

I just started looking over this ebook. I could possibly comprehend everything out of this published e publication. You are going to like the way the author compose this publication.

-- **Giles Vandervort DDS**

This type of publication is every little thing and got me to seeking in advance and much more. I could possibly comprehend every little thing out of this created e publication. I am happy to explain how this is the finest pdf we have study in my very own life and can be he greatest ebook for actually.
