Date :2003-08. This book authors in recent than 20 years. the Department of Peking University courses taught in the accumulation of optical knowledge and experience. book contents IX: Fermat s principle and variable refractive index optics. wave optics Introduction. optical media interface and near-field optical microscopy. interference devices with spatial and temporal coherence of optical field and the laser. multi-dimensional structure of diffraction and fractal optics. optical Fourier transform and phase factor analysis. optical holography. light propagation in crystals. light absorption. dispersion and scattering. The book contains over 600 maps and photos. Example 72. and the allocation of Exercise 186. This book discusses the system and in-depth than the classical wave optics to the modern transformation of the basic concepts and laws of optics. a typical phenomenon and important applications. conceptual clarity . image-rich. simple deduction. is innovative and bright and clean language. is a prominent feature of the book This book is a quite the breadth and depth of the base optical writings. as institutions of higher learning specialty optical physics textbook curriculum. but also available with optical science and technology subjects relevant to all areas of graduate students and scientists study reference. Contents: Chapter 1. Fermat s principle and change the refractive index of the optical refractive index 1.3 1.2 1.1 Huygens principle optical path 1.4 1.5 Fermat s principle Fermat s principle natural variability of the refractive index of 1.6 and 1.7 Imaging artificial light changes the refractive index of light changes the refractive index of 1.8 Review of agenda 1.9 Fermat s principle in Chapter 2 Wave Optics Introduction 2.1 2.2 Light is an electromagnetic wave amplitude...
